

Chemistry - PI 24

PRIMARY HEAT TRANSPORT SYSTEM - MATERIALS

Objectives:

Given access to plant manuals or plant data sheets, fill in the attached work sheet for the station to which the trainee has been deployed. (If not deployed to a station, choose Pickering or Bruce).

As for modules 21-4 and 22-1 this module asks you to fill in a data sheet on system materials; this time for the Primary Heat Transport System.

Ask the course manager for resource material, fill in the sheet, and have him initial it for you. Once again, this data will not be required for check-out purposes.

P.D. Dodgson
